| TANF (Reach-up) <sup>4</sup>       | 366          | 6.5         | 7.6        | 220               | 4.1          | 6.2        | -37.3%                                       | 33.9% lower                        |
| School Meals <sup>5</sup>          | 1,132        | 29.2        | 26.7       | 1,505             | 41.0         | 35.8       | 40.5%  | 14.6% higher                       |
| New Families at Risk <sup>6</sup>  | 7            | 6.5         | 8.4        | 7                 | 7.2          | 6.2        | 10.9%  | 16.1% higher                       |

### ECONOMIC SECURITY

At \$50,212, Lamoille County median household income was slightly lower than the state median of \$51,704.

41% of public school students were approved for School Meals Programs, a 40% increase since 2000.

At 16.6% enrollment in 3SquaresVT (food stamp) benefits, participation was slightly higher in Lamoille than the state average of 15.7%.

Rates of 3SquaresVT enrollments and students approved for School Meals have both increased significantly since 2000—which may be related to increased child poverty as well as improved outreach.

48% of children were enrolled in Dr. Dynasaur/Medicaid, 11% more than the state average of 43.2%.

With the exception of poverty, median income estimates, and school meals, all rates and counts are based on three-year averages. For example, the year 2008 represents the average of 2006-2008.

<sup>1</sup> 2008 data except School Meals (2009) and New Families at Risk (2007).

<sup>2</sup> Since the estimates are not based on direct counts, county data should not be compared. Smaller population areas have wider confidence intervals and should be used with caution. For more details and cautions, see:

<http://www.census.gov/cgi-bin/saige/saige.cgi>. The 2008 Federal Poverty Threshold was \$22,025 for a family with two adults and two children.

<sup>3</sup> Dr. Dynasaur, Vermont's public health insurance program for children and pregnant women.

<sup>4</sup> The Reach-Up Program is Vermont's version of TANF, the federal Temporary Aid to Needy Families Program.

<sup>5</sup> Public school students approved for free and reduced-price Federal School Meals.

<sup>6</sup> Percentage of first births to unmarried women under 20 with less than 12 years of education.

Percent Low Birthweight Babies

### HEALTH

Between 2000 and 2008, the number of children in Lamoille County declined by 5%. During the same time period, the state child population declined by 11%.

Babies with low birth weight—under 5.5 pounds—are at risk of respiratory conditions, cognitive and developmental delays, and long-term conditions. Our *Healthy Vermonters 2010* goal is to reduce the percentage of low birth weight babies to 5.0%. Lamoille County's rate is 7.1% of all live births, down from 8.9% in 2000.

Teen birth rates were 26.6 per 1,000 teen girls aged 15-19, 32% higher than the state rate of 20.1.

The percent of pregnant women receiving prenatal care within the first trimester was 85.4%, compared to the *Healthy Vermonters 2010* goal of 90%.

Births to Teens and Young Teens per 1,000 Births

2007 data except population (2008); 2007 data are from the Vermont Department of Health. All health rates and counts are based on three-year averages. For example, the year 2008 represents the average of 2006-2008. Rates based on small counts should be used with caution. Such rates may change significantly from one period to the next—even if the actual count only increased from 1 to 2.

- 1 Children ages 0-17 as percent of total population.
- 2 Pregnant women who seek early prenatal care (within first trimester), per 100 live births.
- 3 Infants weighing less than 5.5 pounds at birth per 100 live births.
- 4 Infant deaths less than one year of age per 1,000 live births.
- 5 Child deaths per 100,000 children ages 1-14.
- 6 Teen deaths per 100,000 youths ages 15-19.
- 7 Young Teen Births refer to mothers ages 15-17; All Teen Births refers to mothers ages 15-19. Rates are per 1,000 females of the same age.
